

## EDITORIAL

The papers selected for this edition discuss several themes in Systems and Computing. We thank the authors and readers for the dissemination and growth of the Journal of Systems and Computing - Revista de Sistemas e Computação (RSC) as an important means of disseminating academic and scientific works. This allows researchers and students in the field of Computer Science, Information Systems, Computer Engineering, and related fields to find work with diversified topics to support their research and work. In this edition, we once again partnered with the "Simpósio de Sistemas de Informação (Information Systems Symposium)" at the Universidade Federal do Piauí, which resulted in the selection of 4 articles.

In this issue we will have the following articles:

- A Mapping of Challenges and Methods for Data Science Application
- Análise Comparativa de Plataformas em Nuvem para Análise de Dados Turísticos por Não-Desenvolvedores
- Análise Comparativa de Tempo de Restauração: Backups Incrementais, Diferenciais e Intercalados
- Comparison of Consensus Algorithms in Blockchain for the Implementation of Central Bank Digital Currencies
- Can Algorithms Predict Real Estate Prices? Multiple Regression Model Analyses
- Algoritmos DES e AES: comparação dos processos de geração de chaves e cifração
- Unraveling the MixColumns Operation of the AES Cipher Function
- GlaucoAware: Desenvolvimento de uma ferramenta de classificação de glaucoma em imagens do fundo ocular com CNNs
- Paralelismo aplicado na comparação de descrições de assert de testes unitários
- Metodologia Automática para Classificação de Bacilos Utilizando a Arquitetura Faster R-CNN
- Detecção de Amastigotas de Leishmaniose Visceral em Imagens Microscópicas utilizando Redes Neurais Convolucionais

The Journal of Systems and Computing (Revista de Sistemas e Computação) consolidates itself as a solid reference for academic works. Currently, the RSC has in its scientific committee professors from several national institutions, from all geographic regions of Brazil, as well as from renowned international institutions, e.g. Universidad Nacional de Rosario (Argentina). We receive articles for evaluation from higher education institutions from all geographic regions of Brazil. We hope that these articles can contribute to your research and that they serve as an incentive for submitting your work to the RSC.

Prof. Dr. Paulo Caetano da Silva  
Universidade Salvador (UNIFACS)  
Chief editor

Prof. Daniel José Díaz  
Universidad Nacional de Rosario (UNR)  
Chief editor
