EDITORIAL

The papers selected for this edition discuss several themes in Systems and Computing. We thank the authors and readers for the dissemination and growth of the Journal of Systems and Computing - Revista de Sistemas e Computação (RSC) as an important means of disseminating academic and scientific works. This allows researchers and students in the field of Computer Science, Information Systems, Computer Engineering, and related fields to find work with diversified topics to support their research and work.

In this issue we will have the following papers:

- Inclusão Digital em Lojas Virtuais: Uma Análise Comparativa da Acessibilidade em Websites de Comércio Eletrônico no Brasil e EUA
- Usability Analysis of the Federal Institute of Goias' Unified Public Administration System (SUAP)
- Automatic Detection of Personal Protective Equipment in Industrial Environments Using YOLO and the NAO Humanoid Robot

The Journal of Systems and Computing (Revista de Sistemas e Computação) consolidate itself as a solid reference for academic works. Currently, the RSC has in its scientific committee professors from several Brazilian institutions, from all geographic regions of Brazil, as well as from renowned international institutions, e.g. Universidad Nacional de Rosario (Argentina). We receive articles for evaluation from higher education institutions from all geographic regions of Brazil. We hope that these articles can contribute to your research and that they serve as an incentive for submitting your work to the RSC.
